

KLAI HECHEM

Full Stack Developer

El Kef, Tunisia | +216 97 004 515 | hechem.klai@gmail.com | linkedin.com/in/hechem-klai
English (C1) • French (B1) • Arabic (Native)

SUMMARY

Software Engineering graduate (ISI Kef, 2026) with hands-on experience architecting full-stack, microservice-based applications — including PixelHR, a production-style HR platform spanning three microservices and two databases. AWS Certified, with a strong foundation in React, TypeScript, Spring Boot, and REST API design. Seeking a Full Stack Developer role to build reliable, scalable software from day one.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++, PHP
Frontend / Mobile: React, Flutter, CSS, XML
Backend: Spring Boot, Django, FastAPI, REST APIs, Microservices
Databases: PostgreSQL, MongoDB
Tools & Cloud: AWS, Git, Postman, Swagger, Agile/Scrum

KEY PROJECT

Final Year Project, ISI
Kef 2025 – 2026

PixelHR — Full HR Management Platform

- Architected a full-stack HR platform covering employee records, performance tracking, and job management using React, TypeScript, and Spring Boot, unifying HR workflows into a single system through a modular frontend and REST-based microservice layer.
- Reduced manual resume screening effort by building a FastAPI microservice that parses CVs and auto-scores candidates against configurable job criteria.
- Expanded the platform's job-market visibility by engineering a Django scraping module that ingests external job postings into MongoDB and PostgreSQL.
- Automated employee performance evaluation by designing a policy-driven auto-scoring engine, removing manual review from the process.
- Eliminated manual attendance logging by shipping a clock in/out module with compliance tracking and automated notifications.
- Maintained fully documented, version-controlled APIs using Swagger, Postman, and Git across the project lifecycle.

EXPERIENCE

Software Engineering Intern | Pixel Pulsar 2026

- Contributed across the full software development lifecycle — from planning and implementation to testing and deployment — collaborating with the engineering team on live project work.
- Strengthened technical problem-solving and codebase familiarity by working directly with production-oriented tools and workflows.

IT Operations Intern | Tunisie Telecom 2025

- Supported network operations and technical troubleshooting within a corporate IT environment, assisting the operations team with day-to-day infrastructure tasks.
- Gained hands-on exposure to enterprise IT communication protocols and cross-team coordination.

Customer Support Representative | Bon Choix El Kef Dec 2024 – Sep 2025

- Resolved customer inquiries accurately and efficiently, maintaining high satisfaction through clear communication in a fast-paced retail environment.
- Adapted quickly across varied customer situations, strengthening collaboration and problem-solving skills transferable to cross-functional engineering teams.

EDUCATION

Licence (BSc) in Software Engineering | ISI Kef, El Kef, Tunisia Sep 2022 – Jun 2026
Graduated with Honours

Baccalaureate | Lycée Monji Slim, El Kef, Tunisia 2018 – 2022

CERTIFICATIONS & AWARDS

EF SET English Certificate — 78/100 (C2 Proficient) July 2026
EF SET

- Demonstrates C2 Proficient level of English reading and listening comprehension.

Mitigate Threats & Vulnerabilities with Security Command Center July 2026
Google

Skills earned: BeyondCorp Enterprise Security, Cloud Security, Security Command Center.	July 2026
Secure Software Delivery <i>Google</i>	
Demonstrated knowledge in securing the software supply chain and CI/CD pipelines.	July 2026
Software Engineer <i>HackerRank</i>	
Verified problem-solving and algorithmic thinking using SQL, Python, and Java.	July 2026
Python (Basic) <i>HackerRank</i>	
Verified proficiency in Python programming language basics.	July 2026
Google AI Essentials <i>Google</i>	
Skills earned: Generative AI, Machine Learning, and prompt engineering fundamentals.	November 2025
AWS Academy Graduate — Cloud Foundations <i>Amazon Web Services</i>	
Foundational understanding of AWS cloud computing concepts and security.	January 2026
1st Place, Frostbyte Game Dev Hackathon — ISI Kef & ISAM	

LEADERSHIP & ACTIVITIES

Marketing Lead ANT ISIKEF Club	2022 – 2026
Led campaign strategy, content creation, and brand communication for club events, coordinating across departments to grow audience engagement and event turnout.	
Video Editing Lead Astrophilia Club	2022 – 2026
Directed and produced video content for club events and social channels, managing an editing team to maintain a consistent visual identity across productions.
